AIRSIMJUNIOR ☺

AIRSIM JUNIOR

Air Sim Junior is the latest edition to the TruCorp family of advanced airway and resuscitation manikins. True to its heritage, Air Sim Junior has realistic anatomy and a clinical functionality that enables basic and advanced paediatric airway management. Air Sim Junior facilitates training in the use of bag/mask ventilation, supraglottic airway insertion and both naso and orotracheal intubation. In addition, it can be used with all current videolaryngoscopes.

Product Features

Realistic airway allows for training in all aspects of infant airway management including positive pressure ventilation, insertion of laryngeal masks and endotracheal intubations (nasal and oral).

Recommended sizes of tracheal tubes are 3.5-4.0, recommended size of supraglottic airway is size 1.

Realistic external and internal anatomical features allow for easy and successful demonstration of all paediatric videolaryngoscopes.

Recommended size of videolaryngoscope is size 1.

Presented on a lightweight but sturdy frame, AirSim Junior comes shipped with its own lungs to demonstrate correct tube placement and is neatly packaged with its own lightweight case for easy transportation.
